PERMANENT TEETH ARE HERE!

Preventing Cavities in your teeth for life --- *HEALTHY DIET* and *CLEAN TEETH*

HEALTHY DIET CHOICES

- 1) Limit juice, sodas and sports drinks (even sugar free drinks are a problem because of their **ACID** content) ****ACID causes CAVITIES**** --- try not to drink more than *ONE CUP* of these poor choices and drink them during a meal. **WATER** and **MILK** are better choices for strong teeth and bones. **NEVER** swish soda or sports drinks !
- 2) Avoid sticky candies (Starbursts, Skittles, Fruit Snacks, Gummies, Gummy Vitamins, etc) --- chocolate that melts easily or ice cream are better choices. Sour candy is sour because it is rolled in acid powder! ****ACID causes CAVITIES****
- 3). Be careful eating granola bars or breakfast bars. They easily get caught between your molars and cause cavities if you are not flossing .

CLEAN TEETH

Keeping the new ones clean

- 1) Brush your teeth in the morning *after breakfast* and *before you go to bed* .
- 2) Floss every day between any teeth that are tight.
- 3) Use your tongue after you eat anything to make sure your teeth feel slick --- **NOT FURRY** especially after lunch or any snacks (**SLICK = CLEAN** and **HEALTHY**).

CHECK UPS every six months from age 6 until age 12 are very important to monitor the **ERUPTION** and **DEVELOPMENT** of your new teeth. Usually by age twelve, 28 permanent will grow in and replace your 20 baby teeth. You may need an X-ray called a **PANOREX** between 7 - 9 to make sure all of your permanent teeth are present and in the proper position. We need to make sure your teeth erupt correctly.

WHAT ABOUT BRACES ? --- we evaluate your bite at every check up

BRACES at age 7 - 9 - a partial set of braces to align the front teeth

BRACES at age 11 + - full set to align all the teeth

Permanent Tooth Trauma IMPORTANT INFO

PREVENT BROKEN or KNOCKED OUT TEETH

- 1) Wear a sports mouthguard for any contact sport.
- 2) Make sure your lower lip rests in front of your top incisors.

If your tooth is:

- 1) *BUMPED* but in the same position - call us!
- 2) *PUSHED OUT OF POSITION* - try to reposition it and call us!
- 3) *BROKEN* - if you can find the broken piece, please try and locate it and bring it with you so we can glue it back together.
- 4) *KNOCKED OUT* - locate the tooth.
REPLANT IMMEDIATELY --- DO NOT TOUCH THE ROOT !!
Handle the tooth by the crown part and insert it back into the socket and call us ASAP!

Dental Emergency (toothache, mouth pain or accident)
